"Returning to Athletic Participation Post COVID 19 Infection"

~ Nicole Pease, MS, ATC- Select Medical

Learning Objectives: At the end of this activity; attendees should be better able to effectively:

- Implement a phase-based return to play plan
- Discuss long-term COVID complications, how to properly identify and refer.
- Report the newest information in regard to RTP post a positive COVID-19 case.
- Identify any current conditions their athlete may have and how to appropriately return them to play post COVID-19

"Trauma: Beyond Splenomegaly – The Tourniquet is On.....Now What?"

Dr. Peter Thomas, DO, FACOS, FACS

Learning Objectives: At the end of this activity; attendees should be better able to effectively:

- Explain the background and statistics associated with active shooter/mass casualty events.
- Describe the current role of tourniquets and other interventions in the field.
 - Describe how to manage a patient who needs a tourniquet.
 - Define the role that the Athletic Trainer can play in "Stop-The-Bleed" programs in their community to improve trauma care.

SAVE THE DATE
VIRTUAL RIATA STATE MEETING
DATE: MAY 26TH 12:15-1:15PM
